

To fix the permissions on Windows 7 you need to execute the following directions with administrative privileges.

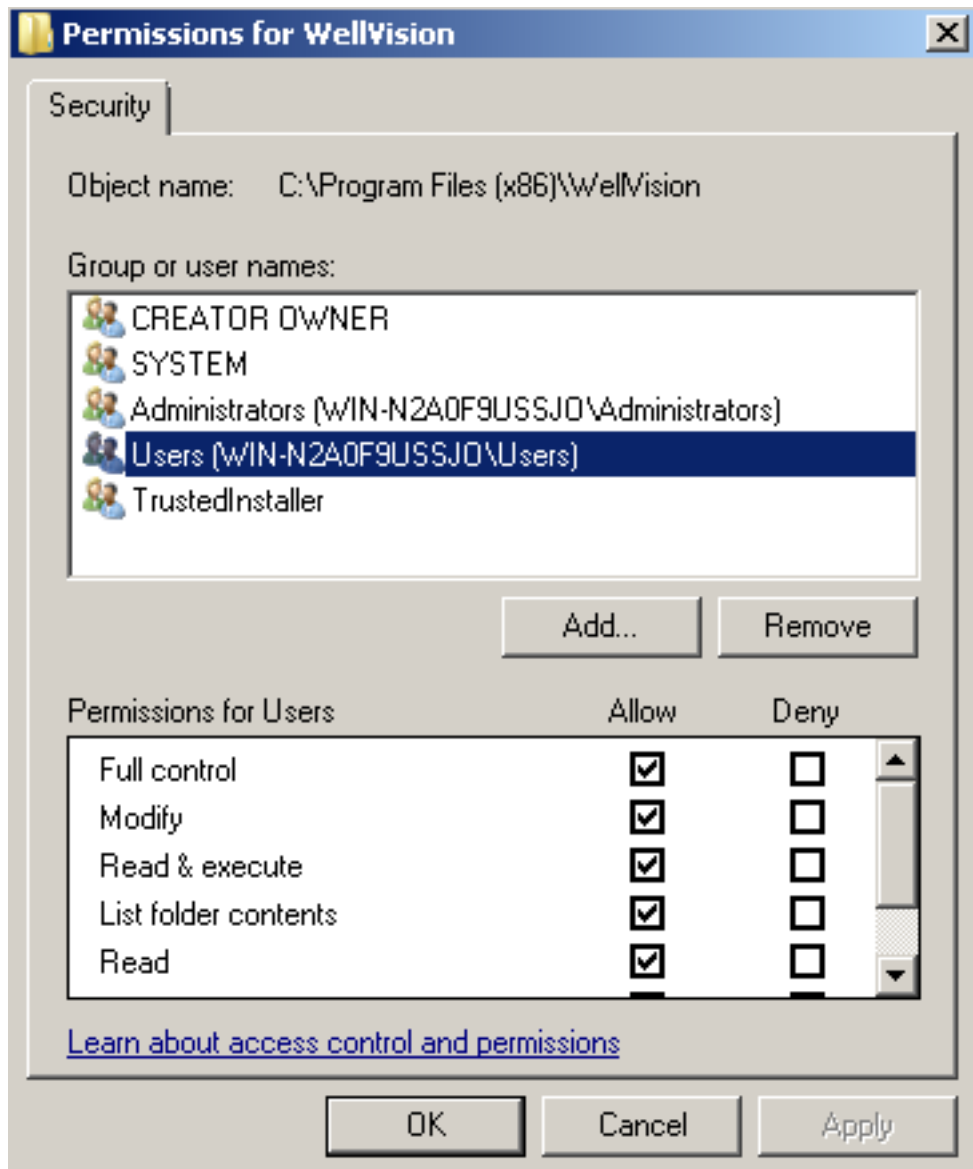

1. Quit WellVision and go to program folders (or Program folders (x86))
2. Right click and select properties on the WellVision folder

3. Select the Security tab and press the Edit button

4. Select the "Users" item in the top list and then make sure the "Full Control" checkbox is selected in the bottom list

5. Press OK until you are back to the Windows Explorer.
6. Run WellVision and update the necessary changes.
